

WH Range

Industrial fan heaters

Key features:

- Summer/winter controller.
- Controller: HC302.
- Suitable for surface or recess installation.
- Colour: white.

Packaging:

Height:	285mm
Width:	315mm
Depth:	450mm
Weight:	6kg

How it works:

Air is drawn through the heater and passed over an open spiral element. The motor is a quiet, totally enclosed shaded pole type. The base of the heater is mounted on a wall with the facility to unplug the head piece for maintenance. For overheat protection, manual reset overheat cut outs are fitted.

How it's made:

The element is designed to operate at black heat for the longest possible life. It is made of nickelchrome alloy in an open spiral design on mica insulators. Aluminium castings are used for the base and grilles with a pressed steel housing. The finish is in powder-coated two-tone grey.

How to install:

The heater has been designed to be installed in two phases. The plug in termination allows for the mounting of the base and electrical connections during construction. The head piece can be installed just before commissioning. Naturally, all installations and wiring must comply with current regulations.

Dimensions:

Specifications:

Power	2kW	3kW
Overheat cut out (up to 25°C)	•	•
Connection phase	Single	Single
Volts/Hz	220/50	220/50
Amps./phase (A)	9.09	13.63
Airflow volume (m³/h)	300	300

Mounting:

Adjustable:

This fan can be adjusted into a variety of different positions and locked into place.
